## Noble Midstream Partners Reports Second-Quarter 2020 Results

### *Self-Funding Business Model Achieved through Cash Cost Reductions and Equity Method Inflection*

**Houston - Noble Midstream Partners LP** (NASDAQ: NBLX) (“Noble Midstream” or the “Partnership”) today reported second-quarter 2020 financial and operational results. The Partnership’s results are consolidated to include Noble Midstream’s 54.4% ownership of Black Diamond Gathering, LLC (“Black Diamond Gathering”).

Certain results are shown as “attributable to the Partnership,” which exclude the non-controlling interests in Black Diamond Gathering retained by Greenfield Midstream. Noble Midstream believes the results “attributable to the Partnership” provide the best representation of the ongoing operations from which the Partnership’s unitholders will benefit.

### **Second-Quarter 2020 Highlights**

- Generated \$48 million Net Income attributable to the Partnership, \$95 million Adjusted Net EBITDA<sup>1</sup> and \$101 million Cash Flow from Operations attributable to the Partnership
- Self-funded quarterly operations with operating cash flow exceeding investing cash flow by \$34 million
- Invested \$5 million in organic capital projects, down nearly 90% sequentially, highlighting the Partnership's cost management and agility in this volatile commodity environment
- Reduced total debt by \$15 million in the quarter and ended the quarter with Net Debt to EBITDA<sup>1</sup> of 4.0x
- Gathered 324,000 barrels of gross oil and gas equivalent per day (Boe/d), down 3% sequentially, and 189,000 barrels of produced water per day (Bw/d), down 7% sequentially
- Recognized increasing Equity Investment EBITDA, resulting from the commencement of full service from the EPIC Crude Pipeline (30% interest) in April and EPIC Y-Grade Pipeline (15% interest) in July
- EPIC Y-Grade commissioned its first greenfield fractionator in Robstown, Texas, with 110,000 Bbl/d of NGL fractionation capacity added in early June

<sup>1</sup> Adjusted EBITDA, Distributable Cash Flow (DCF) and Distribution Coverage Ratio are not Generally Accepted Accounting Principles (GAAP) measures. Definitions and reconciliations of these non-GAAP measures to their most directly comparable GAAP reporting measures appear in Schedule 4 of the financial tables which follow.

Brent J. Smolik, Chief Executive Officer of the general partner of Noble Midstream, stated “In the second quarter, Noble Midstream generated operating cash flows in excess of our capital and equity investments. This provided ample liquidity to fund the quarterly distribution and reduce debt, thus strengthening our balance sheet. We were able to accomplish this by materially lowering our organic capital spend and cutting operating costs. With our gathering infrastructure backbone largely built across both the DJ and Delaware basins, and our joint venture pipelines in service, we are well-positioned to deliver volume expansion in a highly capital-efficient manner as activity increases. Our teams remain focused on minimizing spend and lowering our sustaining capital requirements, while safely executing projects and delivering operational excellence for our customers.”

### **Financial Results Highlighted by Resilient Cash Flows**

Second-quarter 2020 revenues totaled \$146 million, down 35% sequentially, due to lower oil sales revenues and lower volume from gathering and fresh water delivery related to customer activity reductions and short-term producer curtailments. Third-party crude oil sales revenue of \$29 million declined 65% sequentially due to the impact of lower crude oil prices during the quarter. Total expenses were \$85 million with \$20 million in direct operating expenses, down 25% sequentially, as a result of continued cost-reduction measures and temporary reductions in customer activity levels. The Partnership reported second-quarter 2020 Adjusted Net EBITDA<sup>1</sup> of \$95 million, a sequential decline of 12%. Maintenance capital expenditures and cash interest expense attributable to the Partnership totaled \$7.4 million and \$7.1 million, respectively, leading to Distributable Cash Flow<sup>1</sup> attributable to the Partnership of \$80 million.

Noble Midstream invested \$5 million in second-quarter organic capital expenditures, primarily focused on connecting 107 wells across both basins. Prior-capital invested, continued cost reductions and the utilization of existing infrastructure allowed the Partnership to reduce capital requirements. Equity investments during second-quarter 2020 totaled \$25 million, including \$3 million for EPIC Propane and a \$22 million loan to EPIC Y-Grade.

### **Producer Curtailments Impacted Second-Quarter Volumes**

In the Partnership's wholly-owned DJ Basin assets, Noble Midstream connected 16 wells in April on Noble Energy's Mustang acreage and 24 PDC Energy wells. Oil and gas gathering throughput was 161,000 Boe/d and

average produced water volumes were 41,000 Bw/d. Second-quarter volumes were impacted on average by 24,000 Boew/d of curtailments. Freshwater delivery averaged 30,000 Bw/d and the Partnership delivered water to 13 third-party wells. Net DJ Basin capital expenditures totaled \$2.0 million.

Black Diamond oil gathering throughput volumes averaged 79,000 Bo/d, down 14% sequentially, and oil sales volumes were 13,000 Bo/d. Second-quarter volumes were impacted on average by 9,000 Bo/d of curtailments. The Partnership connected 60 wells on Black Diamond's gathering system with 19 wells connected in June. Black Diamond capital expenditures, net to the Partnership, totaled \$0.4 million.

In the Delaware Basin, quarterly oil and gas gathering throughput was 83,000 Boe/d, up slightly sequentially, and produced water gathering volumes were 148,000 Bw/d, down 9% on a sequential basis. These volumes were impacted by 18,000 Boew/d in curtailments during the quarter. The Partnership connected 7 wells, including one third-party well. Delaware Basin net capital expenditures totaled \$2.5 million. With the reduced activity, Noble Midstream plans to optimize utilization of its Central Gathering Facility super-system, further reducing operating expenses.

In July, approximately two-thirds of curtailed producer volumes across both basins returned to production with the vast majority expected to be on line by August 2020.

### **Equity Investment Pipelines In Service**

The Partnership's equity investment income and cash flow generation increased during the quarter, boosted by the commencements of the EPIC pipeline projects, Delaware Crossing, and a full quarter of ownership of the Saddlehorn Pipeline Company, LLC ("Saddlehorn"), acquired in first-quarter 2020.

Interim crude service on the EPIC Y-Grade mainline ended in March and crude volumes transitioned to the Crude mainline in April. EPIC Y-Grade began transition to NGL service in early May and the first greenfield fractionator was commissioned in June, bringing total fractionation nameplate capacity to 180,000 Bo/d. The pipeline commenced full service in early July.

Second-quarter 2020 volumes on Saddlehorn averaged approximately 166,000 Bo/d, down 7% sequentially, highlighting its resilient contract structure and committed shippers on the pipeline. Volumes on the Advantage

Pipeline system averaged 72,000 Bo/d, compared to 93,000 Bo/d during the first-quarter 2020, and generated \$7.6 million in gross second-quarter distributions to the joint venture partners.

Delaware Crossing began transportation of crude volumes from the southern Delaware Basin to Wink, Texas in early April and averaged 20,000 Bo/d in gathering and transportation volumes during the second-quarter 2020.

Delaware Crossing was impacted by 3,000 Bo/d of curtailments during the quarter with a majority of third-party curtailments back online in July. The Partnership does not anticipate any additional equity investment contributions for Delaware Crossing.

### **Protecting the Balance Sheet**

As of June 30, 2020, the Partnership had \$428 million in liquidity and \$1.6 billion in total debt. During the quarter, Noble Midstream paid down \$15 million of its revolving credit facility with available cash flow after capital expenditures and distributions.

On July 24, 2020, the Board of Directors of Noble Midstream's general partner, Noble Midstream GP LLC, declared a second-quarter cash distribution of \$0.1875 per unit, flat versus first-quarter 2020.

### **2020 Outlook Unchanged**

Noble Midstream 2020 organic capital expenditures expectations remain unchanged at \$60 to \$80 million with \$20 to \$40 million remaining in the second half of 2020. The Partnership has maintained its expected 2020 equity investment range of \$240 to \$260 million. The EPIC Y-Grade consortium is deferring the investment decision on the second greenfield fractionator until better line of sight to continued improvement in commodity prices.

Second-half 2020 investment is planned for the expansion of the east dock at the EPIC Crude terminal to support larger vessels and funding the remaining EPIC Y-Grade construction payments.

Noble Midstream expects minimal sponsor activity in the third-quarter 2020 and anticipates the resumption of Noble Energy well completions in the fourth quarter. The Partnership anticipates continued activity from third-party operators in the DJ Basin and now estimates more than 150 well connections this year at Black Diamond with 20 to 30 connections planned in the second half of 2020. With uncertainty around additional producer curtailments and the rate at which activity increases, Noble Midstream will not reinstate 2020 volume guidance at this time.

Based on the existing curtailment and activity scenarios outlined in first-quarter 2020, Noble Midstream maintains its 2020 net Adjusted EBITDA<sup>1</sup> expected range of \$370 to \$410 million and a Distributable Cash Flow<sup>1</sup> range of \$280 to \$310 million for the year. Distribution coverage<sup>1</sup> and leverage expectations remain unchanged as well.

## About Noble Midstream

Noble Midstream is a growth-oriented master limited partnership formed by Noble Energy, Inc. to own, operate, develop and acquire domestic midstream infrastructure assets. Noble Midstream currently provides crude oil, natural gas, and water-related midstream services in the DJ Basin in Colorado and the Delaware Basin in Texas. For more information, please visit [www.nblmidstream.com](http://www.nblmidstream.com).

## Forward Looking Statements

This news release contains forward-looking statements within the meaning of the federal securities laws. Forward looking statements are predictive in nature, depend upon or refer to future events or conditions or include the words “estimate,” “believe,” “budget,” “continue,” “could,” “intend,” “may,” “plan,” “potential,” “predict,” “seek,” “should,” “will,” “would,” “expect,” “objective,” “projection,” “forecast,” “goal,” “guidance,” “outlook,” “effort,” “target,” “on schedule,” “strategy” and other similar expressions that are predictions of or indicate future events and trends and that do not relate to historical matters. Our forward-looking statements may include statements about our

business strategy, our industry, our future profitability, our expected capital expenditures and the impact of such expenditures on our performance, the costs of being a publicly traded partnership and our capital programs. In addition, our forward-looking statements address the various risks and uncertainties associated with the extraordinary market environment and impacts resulting from the COVID-19 pandemic and the actions of foreign oil producers (most notably Saudi Arabia and Russia) to increase crude oil production and the expected impact on our businesses, operations, earnings and results.

Forward-looking statements are not guarantees of future performance and are based on certain assumptions and bases, and subject to certain risks, uncertainties and other factors, many of which are beyond our control and difficult to predict, and not all of which can be disclosed in advance. We believe that we have chosen these assumptions or bases in good faith and that they are reasonable. You are cautioned not to place undue reliance on any forward-looking statements. You should also understand that it is not possible to predict or identify all such factors and should not consider the following list to be a complete statement of all potential risks and uncertainties.

### **Non-GAAP Financial Measures**

This news release also contains certain non-GAAP measures of financial performance that management believes are good tools for internal use and the investment community in evaluating Noble Midstream's overall financial performance. Please see the attached schedules for reconciliations of the non-GAAP financial measures used in this news release to the most directly comparable GAAP financial measures

**Schedule 4**  
**Noble Midstream Partners LP**  
**Reconciliations of GAAP Financial Measures to Non-GAAP Financial Measures**

**Non-GAAP Financial Measures**

This news release, the financial tables and other supplemental information include Adjusted EBITDA, Distributable Cash Flow, and Distribution Coverage Ratio, all of which are non-GAAP measures which may be used periodically by management when discussing our financial results with investors and analysts.

We define Adjusted EBITDA as net income before income taxes, net interest expense, depreciation and amortization and certain other items that we do not view as indicative of our ongoing performance. Additionally, Adjusted EBITDA reflects the adjusted earnings impact of our equity method investments by adjusting our equity earnings or losses from our equity method investments to reflect our proportionate share of the EBITDA of such equity method investments.

Adjusted EBITDA is used as a supplemental financial measure by management and by external users of our financial statements, such as investors, industry analysts, lenders and ratings agencies, to assess:

- our operating performance as compared to those of other companies in the midstream energy industry, without regard to financing methods, historical cost basis or capital structure;
- the ability of our assets to generate sufficient cash flow to make distributions to our partners;
- our ability to incur and service debt and fund capital expenditures; and
- the viability of acquisitions and other capital expenditure projects and the returns on investment of various investment opportunities.

We define distributable cash flow as Adjusted EBITDA plus distributions received from our equity method investments less our proportionate share of Adjusted EBITDA from such equity method investments, estimated maintenance capital expenditures and cash interest paid.

Distributable Cash Flow is used by management to evaluate our overall performance. Our partnership agreement requires us to distribute all available cash on a quarterly basis, and Distributable Cash Flow is one of the factors used by the board of directors of our general partner to help determine the amount of available cash that is available to our unitholders for a given period. We define Distribution Coverage Ratio as Distributable Cash Flow divided by total distributions declared. The Distribution Coverage Ratio is used by management to illustrate our ability to make our distributions each quarter.

We believe that the presentation of Adjusted EBITDA, Distributable Cash Flow, and Distribution Coverage Ratio provide information useful to investors in assessing our financial condition and results of operations. The GAAP measure most directly comparable to Adjusted EBITDA, Distributable Cash Flow and Distribution Coverage Ratio is net income. Adjusted EBITDA, Distributable Cash Flow and Distribution Coverage Ratio should not be considered alternatives to net income or any other measure of financial performance or liquidity presented in accordance with GAAP. Adjusted EBITDA, Distributable Cash Flow and Distribution Coverage Ratio exclude some, but not all, items that affect net income, and these measures may vary from those of other companies. As a result, Adjusted EBITDA, Distributable Cash Flow and Distribution Coverage Ratio as presented herein may not be comparable to similarly titled measures of other companies.

In addition to Net Income, the GAAP measure most directly comparable to Adjusted EBITDA and Distributable Cash Flow is net cash provided by operating activities. Adjusted EBITDA and Distributable Cash Flow should not be considered alternatives to net income, net cash provided by operating activities or any other measure of financial performance or liquidity presented in accordance with GAAP. Due to the forward-looking nature of net cash provided by operating activities, management cannot reliably predict certain of the necessary components of the most directly comparable forward-looking GAAP measures, such as future impairments and future changes in working capital. Accordingly, Noble Midstream is unable to present a quantitative reconciliation of the aforementioned forward-looking non-GAAP financial measures to net cash provided by operating activities. Amounts excluded from these non-GAAP measures in future periods could be significant.
